HEATING COVERAGE

These plans include all types of gas furnaces and boilers on the market. The plans available range from 100% of total coverage to plans giving you a 20% discount on all parts and labour. Whichever plan you choose, we at Mckinnon Heating Cooling will provide you with the best possible service 24 hours a day, 7 days a week, 365 days a year.

Heating system parts included in Standard Heating (SH), Discount Heating (DH), High Efficiency Heating (HH) and Standard Boiler (SB) plans are:

- Aquastat Controls
- Gas Valve
- Door Switch
- Electronic Ignition System
- Fan & Limit Controls
- Fan Motor
- Flame Spreader
- Flow Switch
- Furnace Low Voltage Circuit Fuse
- Gas Burners
- Transformers
- Pilot Burner
- Power Burner Motor (ventor motor)
- Pulley & Belt
- Roll Out Switch
- Thermocouple
- Thermostat
- Vent Pressure Switch

Please note that parts not listed above are not covered by these plans.

All Mckinnon service contracts include a furnace cleaning and/or air conditioner check-up. Both include a replacement type air filter free of charge.

COOLING COVERAGE

Starting or renewing a Mckinnon Cooling Plan provides you with the following:

- One annual Air Conditioning tune up and inspection
- One replacement type air filter
- Extended service hours – 7 days a week with priority preferred service for contract customers

The following parts are covered by your service contract. If you choose the Complete Cooling Plan (CC Plan) these parts and the labour that goes with them are given at a 20% discount off the suggested retail price. Cooling system parts included in CC and DC plans are:

- Thermostat
- Contactor
- Capacitor
- Fan Blade (condenser only)
- Fan Motor (condenser only)

The following parts are not covered by any cooling contract, but will be replaced and/or repaired at a discounted rate of 20%.

- Compressor
- Electrical Breaker
- Disconnect Switches
- All Copper Refrigeration Lines

*Note: Due to government regulations regarding the release of freon into the atmosphere, when an air conditioner is low on freon, we cannot simply fill it back up. The unit must be tested for leaks. This procedure is not covered by any contract and can be quoted to you at the time of the service call by the service person who is at your home.
