

Flushing Tankless Procedures

Annual flushing is recommended

Steps on how to flush:

1. Turn off the water heater
2. Disconnect the power supply
3. Close "C" and "D" valves
4. Connect one hose to "A" valve and place the free end in the bucket
5. Connect one of the hoses to the circulation pump outlet and the cold water line at the "B" valve
6. Connect one hose to the circulation pump inlet and place the free end in the bucket
7. Pour the cleaning solution into the bucket
8. Open both "A" and "B" valves
9. Turn on the circulation pump and allow the solution to circulate through the water heater for at least 45 minutes
10. Rinse the cleaning solution from water heater
11. Disconnect all tubes
12. Remove the cold water inlet filter from water heater and clean out any residue
13. Reinsert filter and ensure the filter cap is securely tightened
14. Reconnect the power supply to water heater
15. Turn on the water heater

The PeakFlowE™ Anti-Scale system helps prevent scale build up, lengthening the time between required flushing
